KAUA'I BEACH SAFETY

ONE-PAGE TERMS · FREE PILOT

OceanSafety Free Pilot, One-Page Terms

Term. 30-day free trial, clock starting the day telemetry is connected and verified. No minimum term beyond the trial. Either party may cancel at any time with written notice (email is fine). No cancellation fee.

1 What this is

A free 30-day trial of the OceanSafety in-room beach-safety amenity, provided by Tropical Agronomics LLC dba OceanSafety, for **one (1) property only**: [Property name]. This is a trial, not a long-term contract. To start, both parties initial this one page.

2 Scope

The trial covers **one (1) property, whole-property**: every guest room and unit at [Property name], approximately [____] keys, under the slug [property-slug]. Additional properties each need their own trial authorization.

3 Success bar (set on Day 1, in the GM's words)

Over the 30-day trial, the property considers the trial successful if its own dashboard reaches: [metric 1, e.g. at least ____ POI taps per occupied unit per week] AND/OR [metric 2, e.g. at least ____ self-serve beach look-ups per week, or at least ____ Stay-Close render-to-clicks per week]. Both parties read these numbers together at the readout on or about [telemetry-start date + 30].

4 What each party does

OceanSafety builds, hosts, maintains, and supports the app, the co-branded page, and the dashboard, and connects and verifies this property's telemetry. The hotel promotes the placard to guests. Entering the amenity and concierge-pick menu is optional and may be handed to OceanSafety as a list; the safety guide works Day 1 without it. Both parties co-brand under the hotel's name and logo for the term of the trial; that permission ends when the trial ends.

5 Cost and conversion

The trial is free: no card up front, no charge during the 30 days. If the bar is met and the GM chooses to continue at the readout, the agreement continues at the flat per-property rate (\$____/mo per the key-count band: 76–200 keys \$1,000–\$1,400 · 200+ keys \$2,000 · 350+ keys \$2,500–\$3,500, set at the readout), billed monthly, cancel anytime in writing. If the bar is not met, or the GM declines, OceanSafety is turned off at no cost. There is no auto-charge and no auto-convert; continuation requires the GM's explicit yes at the readout.

6 Data and privacy

OceanSafety stores no guest names, room numbers, IP addresses, or device fingerprints during the trial. Reporting is aggregate and anonymous (sessions, taps, look-ups, renders). Guests opt in by their own action when they scan the placard. The hotel keeps the guest relationship under its existing privacy terms.

7 Safety and liability

The app shows guidance, not a guarantee of safety. It does not replace lifeguards or posted advisories. To the fullest extent allowed by law, neither party is liable for injury or loss arising from use of the app. The safety-conditions-shown log is a record of what guests were shown; it is not sold or represented as liability protection. (Hawaii attorney review recommended before any liability-value language is used.)

8 No IT lift and no revenue share

OceanSafety is a hosted web app reached by QR. No install, no SDK, no integration, nothing on the hotel's network or PMS. OceanSafety is a per-room software license, not a revenue partner: the hotel keeps 100% of every sale, and OceanSafety never holds guest funds or processes refunds.

Signatures

Both parties initial to begin the free trial. This is a trial authorization, not a long-term contract.
