

OCEANSAFE FOR HOTELS · THE VALUE CASE

What the guide is worth to your property

The market data behind an in-room beach-safety guide — mapped to the numbers every hotel director already answers for: reputation, room rates, guest experience, and the money that walks off-property.

☆ Reputation → revenue

🛡️ Guest safety

📊 On-property spend

For hotels & resorts on Kaua'i, O'ahu & Maui.

WHAT EVERY DIRECTOR ANSWERS FOR

Your number is already on this page

Different chairs at the table, different scorecards — but one in-room guide touches all of them. Here is the same free amenity, read four ways: as risk, as reputation, as guest experience, and as revenue.

#1

drowning is the leading cause of injury-related death for Hawai'i visitors

Hawai'i Dept. of Health, 2025

51%

say a great guest experience is the biggest reason they pick a hotel — ahead of location (48%) and price (42%)

Market Metrix, via Cornell

1 in 5

guests book their tour or attraction on the very day of the experience

Arival, 2025

GENERAL MANAGER

Revenue per room · profit · reputation · guest safety

An amenity guests use every morning — and current ocean conditions in their hands **before they leave the room.**

SALES & MARKETING

Direct bookings · review score · room rate

Better guest experience earns the reviews that **let you charge more per room** — on a channel that carries your brand, not a booking site's.

GUEST EXPERIENCE & ROOMS

Guest satisfaction · loyalty · fixing problems fast

The “where’s a safe beach today?” question, answered 24/7 — guests with the app on their phone report **higher satisfaction.**

REVENUE, DINING & SPA

Extra guest spending, beyond the room

When the ocean’s rough, the guide steers the day back to **your** spa, table, and pool — not off-property.

The guide is free. The figures on the pages that follow are published industry benchmarks and Hawai'i state data — the case for the amenity, not a promise of your results.

REPUTATION IS REVENUE

A better reputation prices every room

Reviews are not a vanity score. Cornell matched hotel review data against actual sales and found reputation moves the two numbers your pricing lives on — the rate you charge per room, and the revenue each room earns.

+11.2%

more a hotel can charge per room for a one-point-better review score (out of 5) — with no drop in how full it stays

Cornell University, 2012

+1.42%

more revenue per room for every 1% its online reputation rises

Cornell University, 2012

53%

won't book a hotel that has no reviews at all

Tripadvisor / PhoCusWright

THE LEVER

Better guest experience → better reviews → the price every room can hold

A one-point gain on a five-point review score let hotels charge 11.2% more per room, with no drop in how full they stayed (Cornell, using Travelocity sales data).

Guests choose on it, too: **51%** say a great guest experience is the biggest reason they pick a hotel — ahead of location (48%) and price (42%), and **76%** of travelers would pay more for a hotel with better reviews. A safety-forward guide is the kind of unexpected, genuinely useful touch guests name in five-star reviews — the ones that lift the score your rate is built on.

We don't promise a review lift. What's shown is the published economics and the mechanism — a guest who feels looked-after rates the stay higher. Your review platform measures the rest.

Sources: Chris Anderson, "The Impact of Social Media on Lodging Performance," Cornell Center for Hospitality Research, 2012 (Travelocity / STR / ReviewPro data). Market Metrix hotel-selection survey, via Cornell. Expedia Group 2025 Traveler Value Index. Tripadvisor / PhoCusWright traveler survey. Metrics: room rate = ADR (average daily rate); revenue per room = RevPAR (revenue per available room).

THE RISK EVERY HAWAII HOTEL KNOWS

Your guests don't know this water

The ocean is the top safety risk your visitors face — precisely because they can't read it the way locals do. The state's own data is stark.

8x

higher drowning rate for
visitors than for residents

Hawaii Dept. of Health, 2025

91%

of Hawaii snorkeling-
drowning victims are visitors
— snorkeling is the top
activity in visitor ocean
deaths

Hawaii Dept. of Health, 2025

83%

of Hawaii drownings happen
in the ocean — roughly 80
lives a year

Hawaii Dept. of Health, 2025

Visitor share of fatal ocean drownings, by island. Kaua'i 76% · Maui 69% · O'ahu 43% — and ⅓ of drownings happen at unguarded beaches or after hours.

OceanSafe puts today's surf, wind, and hazard picture — beach by beach — in every guest's hand before they leave the room. That is the exact information gap that turns an unfamiliar visitor into a statistic.

Guest information, not a liability shield. OceanSafe shows current conditions and hazards. It does not prevent incidents, does not replace a lifeguard, and does not satisfy or certify any legal duty of care. This page is context, not legal advice.

Sources: 2025 Hawaii Water Safety Plan (Hawaii Dept. of Health data); state fatal-ocean-drowning county tables, 2013–2022. Duty-to-warn background: Tarshis v. Lahaina Investment Corp. (9th Cir. 1973); Birmingham v. Fodor's (Haw. 1992).

THE CONCIERGE THAT NEVER SLEEPS

The question your front desk answers all day

“Where’s a good beach today — and is it safe for the kids?” OceanSafe answers it 24/7, in the room, in the guest’s own hand — and guests are measurably happier for the help.

73%

of guests want to manage their stay from their own phone — check in, pay, order, and more

Oracle, 2022

Higher

overall guest satisfaction when the hotel’s app is on the guest’s phone

J.D. Power, 2025

Zero

hardware, kiosks, or front-desk training to stand it up

OceanSafe

- ✓ **Answers before the desk does** — conditions, hazards, and the safe call for today’s weather
- ✓ **Deflects the repeat questions** so your team is free for the requests that actually need a person
- ✓ **Nothing to download** — a QR in the room opens your co-branded guide

Sample screen. The J.D. Power finding is about branded guest apps in general, not OceanSafe specifically — the point is that a useful in-room digital touch tracks with happier guests.

RECAPTURE THE DAY

When the ocean's out, the spend walks off

Rough surf, heavy rain, high wind — that's the day a guest who'd have driven to a distant beach is suddenly looking for a plan. Without a nudge, that plan (and the spend) happens somewhere that isn't your property.

The same guide that keeps guests safe knows when the water isn't cooperating — and turns that moment into a nudge toward **your** spa, restaurant, pool bar, or cabana. **81%** of guests already want these recommendations from their hotel, and spa alone is **3.5% of resort revenue** — one of the fastest-growing lines. On the paid plan, your **Promotions** tab is what captures it.

Spa

The rough-water afternoon becomes a booking.

Dining

Rain keeps them in — feature the table.

Pool & cabanas

Calm, hot mornings stay on-property.

A tap is interest, never a booking. OceanSafe shows demand and steers attention; it doesn't claim the sale. The demand figures are market benchmarks — your own sales numbers measure what actually lands.

Sources: Arival 2025 (in-destination & last-minute booking behavior). CBRE Hotels Research, 2024–25 (resort spa revenue share). YouGov / ALICE guest-recommendations survey (vendor-commissioned).

TIMED PROMOTIONS THAT LAND

The right offer, at the hour it lands

A promotion only works if it reaches the guest while they're still deciding.
OceanSafe ties the offer to the day's conditions and the hours guests plan — the spa when the surf's up, the sunset table the evening before.

40%

of tour & activity bookings
are made last-minute —
within 3 days of the activity

Arival, 2025

1 in 5

guests book their tour or
attraction on the very day of
the experience

Arival, 2025

81%

of guests want local-
experience and upgrade
recommendations from their
hotel

YouGov / ALICE

You set it once — drop a flyer, pick the hours (here, a 4–6 PM happy hour).

...and it pops up on the
guest's phone during that
window.

A real feature, shown here. The offer appears once per guest, only in your window, and never over the safety card. The timing figures are market benchmarks — a tap is interest, not a sale.

WHEN GUESTS PLAN

Push the offer when they're deciding

Guests don't plan evenly — they plan at breakfast, and again the night before. The guide shows those peaks, so your offer lands in the window when it actually gets tapped. **40%** of activities are booked last-minute and **1 in 5** the very same day — timing is the whole game.

- ✓ **Schedule the morning push** for the breakfast planners — the biggest window of the day
- ✓ **Schedule the night-before push** for tomorrow's dinner or spa — the second peak
- ✓ **Match it to the weather** — rough surf pushes the spa, rain pushes the table

i Illustrative chart, sample data. The pattern — morning and night-before planning peaks — is what the timing feature is built around; your own numbers replace these.

THE DATA ASSET

The demand data — yours to take

Every tap tells you what guests wanted, and when — which beaches, which amenities, in which conditions. It's aggregate and privacy-safe (trends and categories, never an individual guest), and your marketing team gets it as an export they can work in.

- ✓ **What the weather drives** — rough surf → spa, rain → dining, calm → the pool
- ✓ **When guests plan the day** — breakfast, poolside, the night before — so you time offers to that clock
- ✓ **Exportable for marketing** — a clean report your team can drop into their own tools

Aggregate demand data — never personal profiles. Trends and categories, never an individual guest. Sample board shown; yours fills with your own numbers once it's live.

PER 1,000 GUESTS

What 1,000 guests put back on your books

The whole idea in one picture, and deliberately conservative — a week of guests, the share who open the guide, and the small slice who act on a well-timed offer.

1,000 guests / week

arrive and settle into their rooms

~300 open the guidea conservative 30% scan the in-room QR
— and see your timed offer**15** bookeven a cautious 5% act
on it**\$2,250**

put back on your books — in a single week. 15 bookings at a \$150 check. The one flat \$649/month plan, cleared three times over.

The day ends on your property — not someone else's.

Illustrative and deliberately conservative. 30% open, 5% book, a \$150 check — drop in your own numbers and it's exact. A tap is interest, not a sale.

DOES THE PAID PLAN PAY FOR ITSELF?

One flat price, and a low bar to clear

Everything so far comes with the **free** guide. The one paid lever — timed, condition-triggered promotions — is a single flat **\$649/month** for the whole property. Here is the bar it has to clear to pay for itself.

BREAK-EVEN

\$649 ÷ your average on-property sale = the nudged bookings a month that make it free

Not per room. Not per booking. One flat rate for the entire hotel.

IF THE GUIDE NUDGES JUST...	AVG SALE	PER MONTH	CLEAR \$649?
4 spa treatments	\$200	\$800	Yes
5 dinners for two	\$150	\$750	Yes
7 cabana / rental days	\$100	\$700	Yes
~1 booking every 3 days	\$70	\$700	Yes

Across a whole property, that is a low bar. And the flat price never rises with occupancy — the busier you are, the more it works in your favor.

Illustrative — your numbers replace these. The sale amounts here are examples; drop in your own figures and the break-even is exact. The guide stays free until you decide the promotions and guest-demand data are earning their keep.

FREE TO START, FLAT WHEN READY

See it working — free first

Two ways in, and neither takes a cut of your revenue. **Free** is the co-branded guide, one featured amenity, and your full guest-demand data.

Paid is a single flat **\$649/month** for the whole property — all co-branding, timed promotions, and unlimited amenities.
