

OceanSafe

OceanSafe for Your Shop

Put your shop, your rentals, and your tours inside the beach guide your guests already open — keep your own Square, and your money.

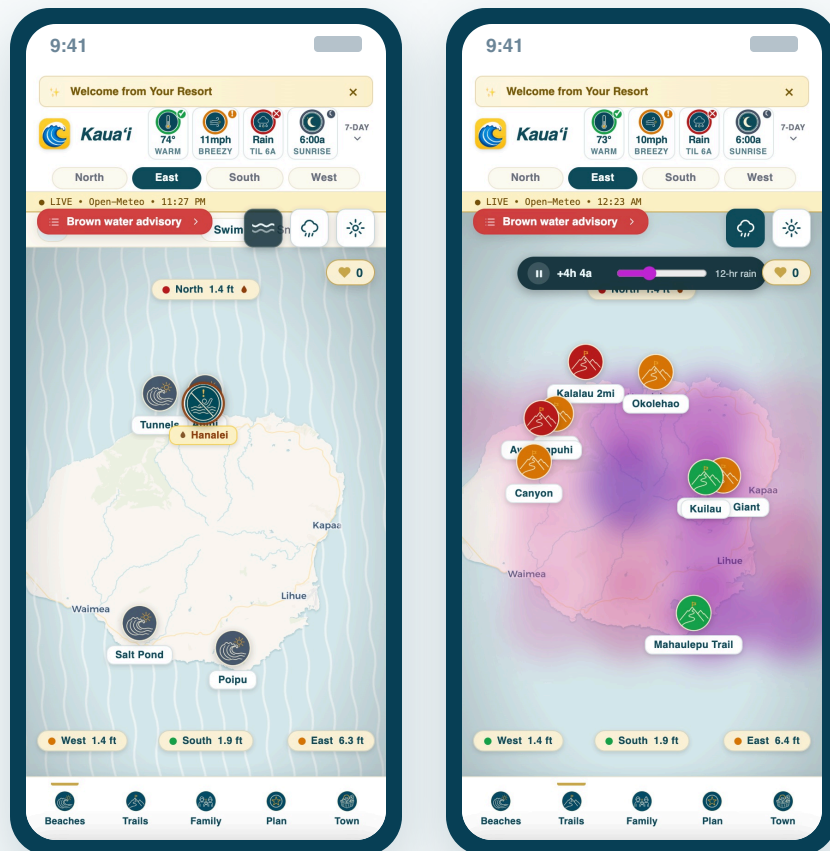

✓ Your Square, your money

✓ Free to join

THE APP YOUR SHOP SITS IN

Guests already open it for the beach

OceanSafe is the guide visitors check before they head out — live surf and swell, a 12-hour rain radar, hazards, trails, and where to go today. Two taps flip the map between conditions. **Your shop rides right inside that app**, in front of guests who are already planning their day.

Swell & surf overlay — how the water is running, shore by shore.

12-hour rain radar — when the beach is out, guests look for something to do.

Why it matters to you: on a rough-water or rainy day, guests aren't at the beach — they're on their phone looking for a shop, a rental, or a tour. That's your window. Sample screens.

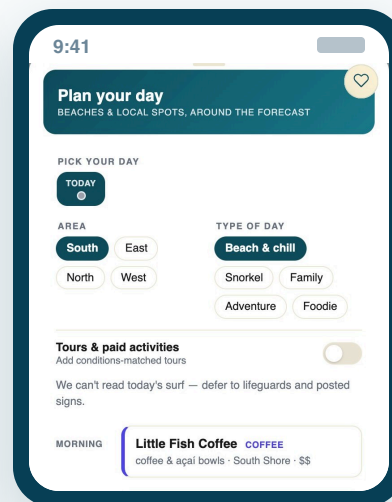

WHAT YOUR GUESTS SEE

Your shop and your tours — in the app they already opened

Guests don't download one more shopping app. They open OceanSafe to **read the water** — surf, wind, rain, UV — before they head out. Your storefront sits in the **Town** tab and your tours in **Plan**, one tap from the conditions they already trust. Nothing to install, no link to chase.

Town — your shop, in the same bar as Beaches, Trails & Family.

Plan — guests switch on **Tours & paid activities** and your tours appear, matched to the day.

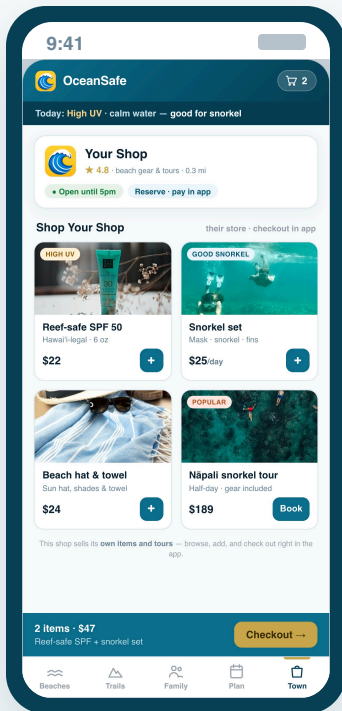

One app, both sides: Beaches, Trails and Family are why guests are here — Plan and Town are yours. Your shop and tours ride along on a tool they already open every day of the trip. Sample screens; live conditions vary.

WHAT IT IS

Your shop, inside an app guests trust

Guests browse and buy right in the app and **pay through your own Square** — the money lands in your balance and OceanSafe takes a flat 6.7%. Here's both sides.

WHAT YOUR VISITORS SEE

Your products **and** tours in one place, each flagged for the day — a snorkel set on calm water, sunscreen when the UV is high. Guests tap **Add**, then **Checkout** right in the app.

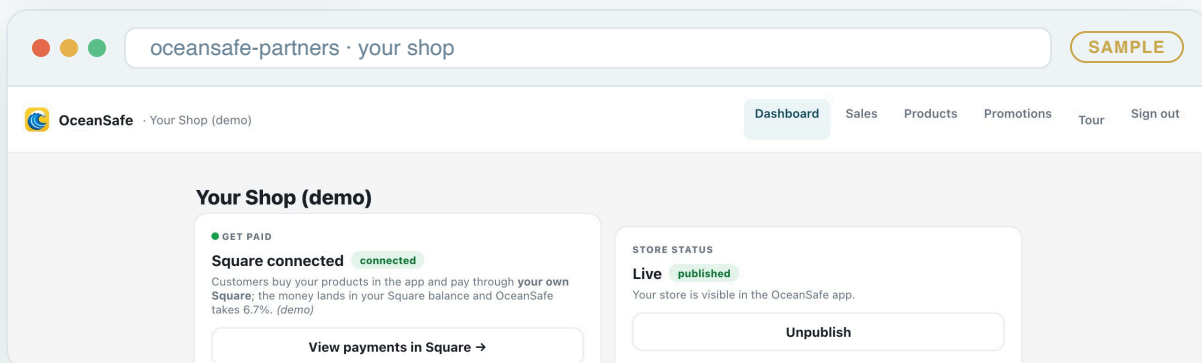

Your Square · money lands in your own account

93.3% · your payout after the flat 6.7%

1 tap · publish or unpublish

The **High UV** and **Good snorkel** tags come from the same live conditions on the beach pages — so the right item surfaces on the right day, and guests reach for the shop when they already need it.

WHAT YOU RUN

STOCK IT IN MINUTES

Products, rentals, and tours — in one place

Already run a register? **One tap imports your Square catalog** — names, prices, and photos. Add rentals with a return time, or drop in an affiliate tour link and earn a commission.

Products

+ Add product

Already have your items in Square?

One tap copies them in — names, prices, and photos. They start hidden so you can look everything over first.

4 items imported — they start hidden. Review below, add photos where missing, and switch on the ones to show. 1 item was skipped — no set price in Square (priced at the register). Give it a fixed price in Square, then import again. (Demo — nothing was really imported.)

Prices update when you re-import — checkout always charges the price shown here.

Import from Square

Demo mode — tap "Import from Square" above to see the one-tap import, or add your Supabase keys in config.js to manage real products.

PRODUCT	TYPE	PRICE
Reef-safe SPF 50 — 6 oz from Square sunscreen · hidden · no photo yet — tap Edit to add one · name & price come from Square (re-import refreshes them)	storefront	\$22.00 demo
Snorkel set — adult from Square snorkel gear · hidden · no photo yet — tap Edit to add one · name & price come from Square (re-import refreshes them)	storefront	\$49.00 demo

RUN A PROMOTION

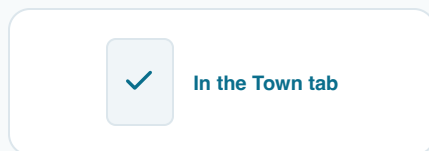

Drop a flyer for your tour. Guests see it.

Make a deal — a tour discount, a rainy-day rental rate, a happy hour. **Drop the PDF onto your shop** and it lands in the tab your guests already open. Pull it down just as fast when the run is over. The same promotions a hotel runs — pointed at your tours.

1 · DROP YOUR FLYER

2 · IT LANDS IN YOUR GUIDE

3 · GUESTS SEE IT

Where it shows: your promo appears in your shop and the Town area of the guide, beside the conditions — never on a beach's safety verdict. The next page tells you the hour to show it. Sample screens.

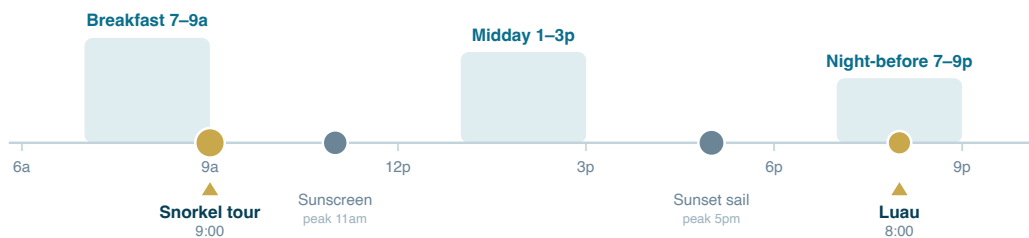

PROMOTE AT THE RIGHT TIME

See your guests. Push the right tour, right when they're planning

The same insight the hotels get — pointed at **your tours and products**. About 180 guests a day open the guide near you. Lay when they're planning over when each thing gets tapped, and you get a clock: push the snorkel tour at breakfast, the sunset sail at 5, the luau at 8.

The best time to show a promotion

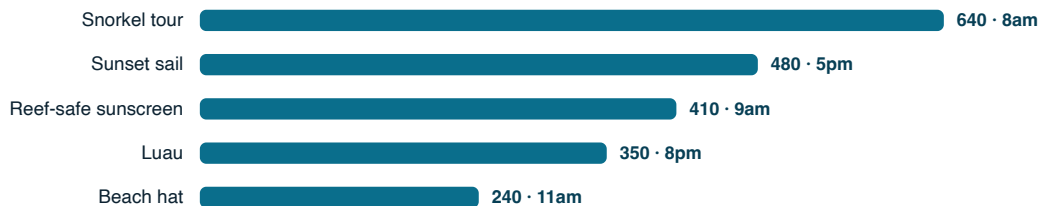

SAMPLE

Snorkel tour at 9am, luau at 8pm — each lands where a thing guests already reach for meets a window they're already in. A tap is interest, never a booking. AGGREGATE COUNTS · NO INDIVIDUAL TRACKING · SAMPLE DATA

What guests tap most

SAMPLE

Your best sellers and their busiest hour — the promo clock is this list, read back by time of day. Promotions work just like a hotel's: pick the tour, pick the hour.

ORDER AHEAD

They order before they land — it's ready when they arrive

A link in their booking confirmation opens their OceanSafe, already set to their rental and their dates. They see the beaches near them and the week's outlook, then order gear and tours before they land. It's bagged and waiting at your pickup spot — so day one is a beach day, not a gear run.

STEP 1

In your confirmation

The link rides in the booking email you already send — no app to download.

STEP 2

Opens to their trip

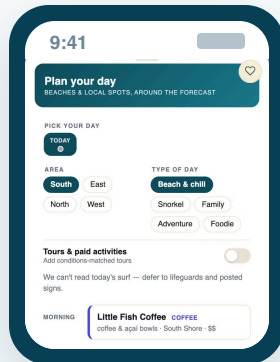

OceanSafe lands on their rental and dates — the beaches nearby and the week's outlook.

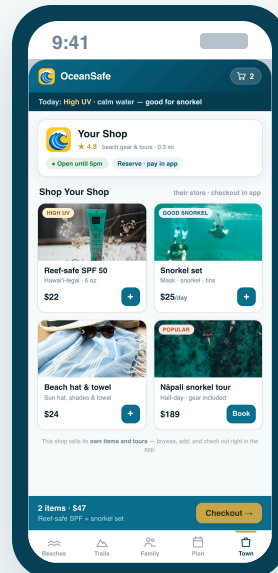

STEP 3

They order ahead

Gear and tours, paid before they fly in — straight to your Square.

The week ahead — plan the days, book the tours.

Order gear + tours right in the app.

Ready when they land. Bagged and waiting at the spot you pick — the office, a lockbox, the front desk, or a partner shop.

For rental managers: gear and tours booked before check-in, on your own Square. **Their dates come from your booking confirmation** — nothing to integrate; the reminder fires about a week out. Sample screens.

ONE EASY LINK

One link in your confirmation — their dates fill themselves in

No app to build, no integration. You paste one link into the booking confirmation your system already sends. It fills in the guest's dates on its own and opens their OceanSafe set to those dates — ready to plan and order.

1 · PASTE THIS ONCE

```
oceansafety.app/r/kai-cottage?in={CHECK-IN}&out={CHECK-OUT}
```

↓ your booking system fills the dates

2 · WHAT THE GUEST GETS

```
oceansafety.app/r/kai-cottage?in=2026-08-12&out=2026-08-19
```

↓ one tap

Opens their OceanSafe — already set to **Aug 12–19**, their rental, and the beaches nearby.

IN THE CONFIRMATION THEY ALREADY GET

DROP THE LINK WHERE THEY ALREADY LOOK

The confirmation email button

A pre-arrival text

A QR on the welcome sheet

That's the whole setup. No code — the button in their existing confirmation carries the dates. Want it fully hands-off? A booking-system webhook can generate the links for you later. Sample.

GET YOUR GEAR BACK

Rentals that come back on time

Every rental order carries a **return-due time**, with an overdue flag when it slips. When a guest rents, they can **opt in to a reminder text** — a friendly nudge before it's due. Fewer lost boards, fewer awkward calls.

Opt-in at checkout

The guest enters their cell and agrees to a return reminder — consent captured with the order.

A nudge before it's due

"Your snorkel set is due back at 4pm — reply DONE when returned."
One tap sends it.

9:41

RENTING — CHECKOUT

Snorkel set rental

\$25 / day · due back tomorrow
4:00 pm

Text me a reminder when it's due back

Msg&data rates may apply. Reply STOP to opt out.

Your Shop

Aloha! Your snorkel set is due back at 4:00 pm today. Reply DONE when it's returned. Reply STOP to opt out.

Live today: return-due tracking and the opt-in; the reminder sends from your phone in one tap. **Coming next:** fully automatic sends once carrier registration clears. Guests always opt in, and every text carries a one-word opt-out. Sample screens.

START FREE, KEEP 100%

Free to start — we only earn when you do

You don't pay to switch it on. **Free** gets you the storefront and pre-arrival ordering, and we split the upside — 50/50 on tour commissions, 6.7% of store sales. Go **Paid** to keep every dollar **and** unlock the growth tools: analytics, promotions, and demand data across your properties.

FREE · START HERE

\$0/mo

We only earn when you do

You keep **50% of tour commissions** and **93.3% of store sales**. We take the other half of tours and a flat 6.7% of store.

Storefront, pre-arrival ordering, and return-reminder texts.

PAID · KEEP IT ALL

\$829/mo

Keep 100% + the growth tools

You keep **100% of tour commissions** and **100% of store sales**. We take nothing on what you sell.

Everything in Free, plus **visitor analytics**, **promotions**, and **multi-property demand data**.

When does Paid pay off? Once you're running volume, the split we'd take on Free tops **\$829** on its own — Paid stops the split, keeps you at 100%, and adds analytics, promotions, and cross-property data to sell more.

Three ways it earns for you: gear that rents before check-in, in-stay orders while guests are on the app, and commission on every tour you refer. Start Free; go Paid when it pays. Sample screens.

AGGREGATED FOR YOU

See what your guests want — one property or your whole portfolio

Every tap in the app near you rolls up into plain-English demand data. On one property it's the pulse of your local guest; across many, it's your whole portfolio at a glance — aggregate counts only, never individual tracking.

SINGLE PROPERTY

The pulse of your local guest

- ✓ **Top beaches & spots** your guests are opening
- ✓ **What they browse** — beaches, tours, or the shop
- ✓ **When they plan** — time of day and days ahead
- ✓ **What they tap & order most** — gear and tours
- ✓ **Rough-water & rainy-day demand** — when they turn to the app
- ✓ **Conditions** → **demand** — high UV sells sunscreen, calm sells snorkel

MULTI-PROPERTY

Your whole portfolio at a glance

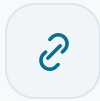

- ✓ **Every unit's data, rolled up** across your portfolio
- ✓ **Compare units** — which drive the most orders
- ✓ **Hot beaches & activities** near each property
- ✓ **Demand by season & conditions**, portfolio-wide
- ✓ **Where to stock, staff & promote** next

 **Aggregate only.** Counts of what guests tap and plan — no names, no individual tracking. It tells you what guests want, never who they are. Included with **Paid**. Sample screens.

START TODAY

Turn it on. Keep your Square, keep your customers.

Connect your Square, import your catalog in one tap, and you're inside the app guests already open — usually live within a day. Start on Free, move to Paid whenever the numbers say so. Cancel anytime.

STEP 1

Connect Square

Your account, your payouts — we never touch the money.

STEP 2

Import your catalog

One tap pulls in names, prices, and photos.

STEP 3

You're live

Your shop and tours show up for guests nearby.

Start free — no fee to switch it on

We only make money when you do. Go Paid to keep 100% and unlock analytics, promotions, and cross-property data.
