

OCEANSAFE FOR HOTELS

# Your Hotel × OceanSafe

The free beach-safety guide your guests open from a QR in the room — carrying your brand, and keeping the day on your property.

For hotels & resorts in Hawai'i.

## WHAT OCEANSAFE IS

## The screen guests open before the beach

Guests open **oceansafety.app** to see today's surf, wind, UV index, rain radar, and hazard warnings for the beach they're headed to — a free amenity, not a brochure, worth opening in the moments before they leave the room. **No app to download, nothing for your team to install.** Live on Kaua'i, O'ahu, and Maui today; Hawai'i Island is in build.

Two taps flip the map between conditions — surf, wind, UV, rain. It's the tool a guest checks each morning of the stay, before deciding where to go and what the day looks like.

**Live surf, wind & UV****12-hour rain radar****Hazards, beach by beach**

**Free for guests, always.** Live on Kaua'i, O'ahu, and Maui today; Hawai'i Island is in build. Sample screen; conditions vary by day. The value to you is the placement and the on-property pull — not a traffic number we can't source.

NO INSTALL, NO APP

## In every room, nothing to build

A single co-branded QR puts the guide in front of every guest — **in the room, at the lobby, in the welcome email**. They scan, and land on your co-branded page at [oceansafety.app/p/your-hotel](https://oceansafety.app/p/your-hotel), carrying the same free guide with your branding. No download, no kiosk, no IT project.

### Wind, tide & swell

**Onshore 16 mph**  
forecast wind

**Tide rising**  
predicted

**Swell 8s**  
forecast swell

#### In the room

A tent card or TV screen  
QR by the bed

#### Lobby & concierge

Co-branded card &  
standee, shipped to you

#### Welcome email

One link in your pre-  
arrival note

**Straightforward to run:** the QR is a static co-branded code for your property — print it, place it, done. No new hardware and nothing for the front desk to manage. Sample card shown; the guest lands on your co-branded page.

## KEEP THE DAY ON-PROPERTY

# When the ocean's rough, the day stays with you

The same guide that keeps guests safe tells you something valuable: **the days the water isn't cooperating**. High surf, strong wind, heavy rain — that's when a guest who'd have driven to a distant beach is looking for something to do. OceanSafe turns that moment into a nudge toward **your** spa, restaurant, pool bar, or cabana.

## Spa & wellness

The rough-water afternoon becomes a booking.

## Dining

Rain keeps them in — feature the restaurant.

## Pool & pool bar

Calm, hot mornings — the pool day.

## Cabanas & rentals

On-property, when the beach is out.

**Recapture the spend that walks out the door.** Every guest who stays on-property on a rough-water day is revenue that would otherwise have driven off to a beach and a food truck.

FOR YOUR MARKETING TEAM

## Promotions timed for max conversion

Turn the day's conditions into a promotion — and **time it right**. The data shows when your guests are planning their day, so the offer lands on the guide they're already looking at, at the moment it matters most: the spa when the surf's up, the sunset table the night before, the pool bar on a hot morning.

What the guest sees — the offer pops up on the guide they already opened.

- ✓ **Timed** — push when guests are planning, not whenever
- ✓ **Condition-triggered** — rough surf → spa, rain → dining
- ✓ **Drag-and-drop** — drop a flyer in, guests see it

**Sample screens.** The co-branded page and analytics are live today; timed promotions on the guide are on the near roadmap. Illustrative timing data — no performance numbers implied.

FOR YOUR MARKETING TEAM

# Guest demand, tied to the weather

A property rarely gets to see *why* on-site demand moves. OceanSafe ties beach intent and the day's weather to what guests reach for — so you know which amenity to feature before the day starts. Aggregate and privacy-safe: trends and categories, never individual guests.

- ✓ **What the weather drives** — rough surf → spa, rain → dining, calm → pool
- ✓ **When guests plan the day**, so you feature the right amenity at the right hour
- ✓ **Which conditions keep guests on-property** versus heading out

**Sample dashboard — illustrative data.** The real dashboard is in build; this shows what your marketing team would work in. Always aggregate and privacy-safe — what guests browse and plan, never who they are.

FOR YOUR MARKETING TEAM

# The data your marketing team lives in

The deeper view, built for marketers: an **amenity-demand funnel**, **12-week trend lines**, a **conditionxamenity heatmap**, and a **7-day demand forecast** that tells you which amenities to promote in the days ahead — all aggregate and privacy-safe.

**Sample dashboard — illustrative data.** The real board is in build; this is the range of views your marketing team would work in. Everything stays aggregate — funnels, trends, and forecasts, never an individual guest.

## WHAT IT COSTS

## Free to start. Flat when you're ready.

Two ways in, and neither takes a cut of your revenue. **Free** is exactly that — the co-branded guide, one featured amenity, and your full analytics, at no cost. **Paid** is a single flat **\$649 per month** for the whole property: all co-branding, timed promotions, and unlimited amenities. One price, no per-room math, no per-booking fee.

**FREE****\$0**/mo**Free to start · no card needed**

- ✓ Co-branded guide + in-room QR
- ✓ One featured amenity
- ✓ Your full demand analytics
- ✓ Lobby card & welcome-email link

**PAID****\$649**/mo flat**Whole property · no per-room, no per-booking**

- ✓ Everything in Free
- ✓ Unlimited featured amenities
- ✓ Timed, condition-triggered promotions
- ✓ Full market intelligence board

**One flat price, whole property.** \$649/mo covers the entire hotel — not per room, not per booking. The busier your property, the more that flat rate works in your favor.

**Start where you like:** begin on Free, and move to Paid when the promotions and the data are earning their keep. No lock-in.

## NEXT STEP

## Start free — live in a week

The clean way in is to turn it on **free** and see it working — the in-room guide, the Stay-Close nudge, and your demand analytics, all live. We build your co-branded page, ship the QR cards, and stand it up. From there, you decide when the paid promotions earn their place.

**STEP 1**  
**Send us your brand**

Logo, colors, and the amenities you want featured.

**STEP 2**  
**We stand it up, free**  
Co-branded page up, QR cards shipped, analytics on.**STEP 3**  
**Guests start scanning**  
In the room, at the lobby, from the welcome email.**STEP 4**  
**Turn on promotions**  
When you're ready, the flat plan unlocks the rest.

**Account support included:** a named account contact and a quarterly business review come with the relationship. We'll confirm your amenity list with your team before you go live.

### Let's turn on your free guide

Live in the room in about a week, free to start — and you see it working before anything is paid.
