

AVERAGE SALE × CONVERSION

What 1,000 guests are worth to your store

Start with 1,000 guests reached — a QR at the counter, on receipts, in your booking confirmations. At benchmark rates **18 buy in-app**; the same audience on a website yields **6**. From there it's just your average sale:

THREE STORES, SAME 1,000 GUESTS

Beach essentials shop
Average sale \$45 — sunscreen, hats, dry bags

\$810/mo · yours to keep
≈ \$9,700 a year

Same guests on a website: **\$270/mo**
— the app's 3x conversion is the whole difference.

Rental counter
Average rental \$65 — snorkel sets, boards, chairs

\$1,170/mo · yours to keep
≈ \$14,000 a year

Same guests on a website: **\$390/mo**
— the app's 3x conversion is the whole difference.

Tour desk
Your commission ≈ \$30 per booking (20% of a \$150 tour)

\$540/mo · yours to keep
≈ \$6,500 a year

Same guests on a website: **\$180/mo**
— the app's 3x conversion is the whole difference.

OR RUN YOUR OWN NUMBER

YOUR AVERAGE SALE	WEBSITE · 6 ORDERS	IN-APP · 18 ORDERS	THE GAP, EVERY MONTH
\$25	\$150	\$450	+\$300
\$45	\$270	\$810	+\$540
\$65	\$390	\$1,170	+\$780
\$95	\$570	\$1,710	+\$1,140

How to read this. Sales per 1,000 guests reached on the **Paid plan** — you keep 100% of store sales and tour commissions (\$829/mo flat; on Free, a split applies instead of a fee). Rates are published benchmarks — 2% web, 3x in-app (Criteo) — with 30% opens as a working assumption, not a promise. Every extra 1,000 guests repeats the table; your dashboard replaces it all with measured numbers in month one.
