

ONE-PAGE TERMS · FREE USE

OceanSafety Free Use, One-Page Terms

Term. Free use, starting the day telemetry is connected and verified. No fees, no subscription, no minimum term. Either party may cancel at any time with written notice (email is fine). No cancellation fee.

1 What this is

Free use of the OceanSafety in-room beach-safety amenity — the co-branded guest website and the private operator analytics dashboard — provided by Tropical Agronomics LLC dba OceanSafety, for **one (1) property only**: _____. No payment is involved. To start, both parties initial this one page.

2 Scope

This agreement covers **one (1) property, whole-property**: every guest room and unit at _____, approximately _____ keys. Additional properties each need their own signed authorization.

3 What each party does

OceanSafety builds, hosts, maintains, and supports the app, the co-branded page, and the dashboard, and connects and verifies this property's telemetry. The hotel promotes the placard to guests. Entering the amenity and concierge-pick menu is optional and may be handed to OceanSafety as a list; the safety guide works Day 1 without it. Both parties co-brand under the hotel's name and logo for the term of this agreement; that permission ends when the agreement ends.

4 Cost — free, no subscription

Free means free: no card, no charge, no subscription, and no automatic conversion to a paid plan — there is nothing to cancel and no bill that starts later. The property gets the co-branded guest site and the private analytics dashboard at no cost. If OceanSafety ever introduces paid options, nothing changes for this property without a new agreement signed by both parties.

5 Data and privacy

OceanSafety stores no guest names, room numbers, IP addresses, or device fingerprints. Reporting is aggregate and anonymous (sessions, taps, look-ups, renders). Guests opt in by their own action when they scan the placard. The hotel keeps the guest relationship under its existing privacy terms.

6 Safety and liability

The app shows guidance, not a guarantee of safety. It does not replace lifeguards or posted advisories. To the fullest extent allowed by law, neither party is liable for injury or loss arising from use of the app. The safety-conditions-shown log is a record of what guests were shown; it is not sold or represented as liability protection.

7 No IT lift and no revenue share

OceanSafety is a hosted web app reached by QR. No install, no SDK, no integration, nothing on the hotel's network or PMS. OceanSafety is a hosted software amenity, not a revenue partner: the hotel keeps 100% of every sale, and OceanSafety never holds guest funds or processes refunds.

Signatures

Both parties initial to begin. This is a free-use authorization, not a purchase and not a subscription.
